DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of Claims 1-13 in the reply filed on October 1, 2004 is acknowledged. The traversal is on the ground(s) that "claim 1 includes an open-ended preamble (i.e., comprising) and this, covers apparatus that includes additional element..." This is found persuasive. Accordingly the restriction of August 31, 2004 is withdrawn. A new restriction is set forth herein below.

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I, Claims 1-13, drawn to Apparatus for Forming Conductive Bumps, classified in class 228, subclass 44.7+.

Group II, Claims 14-25, drawn to Method for Forming Conductive Bumps, classified in class 438, subclass 613. The inventions are distinct, each from the other because of the following reasons:

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:

4. Inventions Group II and Group I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the apparatus of Group I can be used to perform different process of Group II by forming the conductive bumps separately in the bump site and transferring the bumps into the chamber to attach the bumps with the semiconductor devices instead of forming the bumps on the semiconductor devices at a bumping site.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

6. Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicants are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
